 \* Indicates Thousands  
 0 Indicates General Authority  
 NC Indicates National Currency  
 N/A Not available  
 (...) Indicates the data is not available

† The structural indicators data series on the subcomponents of Total assets and Total fundliabilities and equities do not tend to agree with disaggregated position, because there are differences in these source documents, between the SFI Management account data and the data submitted on the FIA, even though they are the same variable heads. The data source files are based on the SFI Management account submission made in MS Excel, going forward, the Management account will be phased out, to be replaced by an electronic submission; FIA.
